ABSTRACT

The author of the article claims that archaeological and scientific research was carried out at the settlement of Afrasiab in the second half of the twentieth century. The article presents material on the archaeological work and research of N.B.Nemtseva, who investigated the stratigraphic basis of individual monuments at the settlement of Afrasiab and in the Shahi-Zinda area. Based on the data of the excavations of N.B.Nemtseva and A.I.Terenozhkin, archaeologists have information about the southern parts of the ancient city. N.B.Nemtseva conducted archaeological excavations and studies to identify the sequence of cultural layers in connection with the study of the historical and architectural complex of the mausoleum of Shahi-Zinda.

KEYWORDS: Afrasiab, Shahi-Zinda, Samarkand, N.B.,Nemtseva, Archaeological Excavations, Archaeological Finds, Archaeological Methods, Archaeological Research, Periodization.
