### ABSTRACT

*The article discusses the state regulation of pharmaceutical activities in the Republic of Uzbekistan. Pharmaceuticals are considered high-tech and science-intensive production processes due to the fact that it is the level of provision of the population with medicines that is the main indicator of the social development of society. The regulatory framework, state support and development prospects of the domestic pharmaceutical industry are analyzed, and state programs aimed at the development of this industry in the country are considered. The main factors that hinder the production of efficient and safe pharmaceutical products that are competitive in the external and internal markets are highlighted.*

**KEYWORDS:** Government Regulation, Pharmaceutical Activities, National Economy, Government Support, Government Programs, Government Control, International Standards.
