ABSTRACT

The article covers the concept of digital economy, its economic significance and development issues. In addition, digital technologies not only improve the quality of products and services, but also reduce unnecessary costs. At the same time, the country plays a major role in eradicating the scourge of corruption, the most serious obstacle to development. Then the industrial economy is also very important in determining the rules of telecommunications.

KEYWORDS: *Digital Economy, Information Technology, Informatization And Digitization Process, Telecommunication Networks.*
