ABSTRACT

According to the content, the research carried out in world linguistics can be divided into three paradigms: comparative-historical, system-structural and anthropocentric paradigm. The analysis of the comparative-historical paradigm has a sign of antiquity, and due to its connection with the development of languages, it has been attracting attention as a current direction until now. System-structural linguistics was formed later than comparative-historical linguistics.

KEYWORDS: *System-Structural Linguistics, Psycholinguistics, Pragmatic Linguistics, Cognitive Linguistics, Language And Culture, Intercultural Communication, Linguistic Culture, Linguoculturalology, Language Units, Time.*
