### ABSTRACT

*In Uzbekistan, HPP generation is counted as electricity produced from renewable energy sources (RESs). The energy sector is the most important sector for the economies of countries around the world. This sector also has a significant impact on the stability of the national economy. A large part of the national income of countries is formed in this sector. The investment factor is very important for this sector. In the Uzbekistan's economy, the energy sector is also a factor that has a positive impact on macroeconomic stability. Therefore, increasing the attractiveness of investment in this sector is the most pressing issue today. Therefore, this article analyzes the current state of development of the energy sector in Uzbekistan and the investment factor affecting it.*

**KEYWORDS:** *Energy, Energy Sector, Economic Stability, Renewable Energy, Investment, Investment Attractiveness, Investment Projects, National Income, Public-Private Partnership.*
